

Organic waste is a valuable raw material.

Which is why it's important to separate it by type!

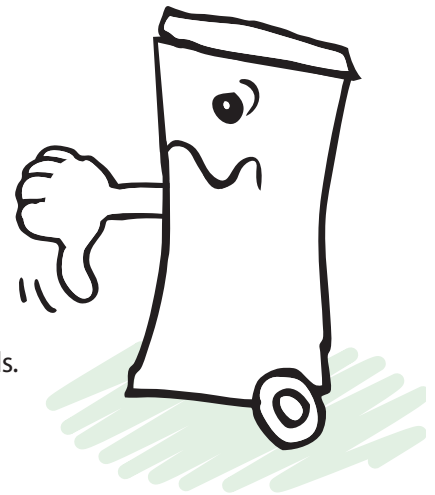

All **compostable** waste from your kitchen and garden belongs in the organic waste bin, such as:

- ✓ Fruit and vegetable waste
- ✓ Coffee filters, teabags, egg shells
- ✓ Leftover food (even if it's spoiled), as well as bones from meat and fish
- ✓ Grass cuttings, leaves
- ✓ Tree and bush cuttings
- ✓ Withered flowers and potted plants (without decorations or pots!)
- ✓ Newspaper and kitchen paper used to wrap kitchen waste

The following does **NOT** belong in the organic waste bin:

- ✗ Packaging made from plastic, glass or metal
- ✗ Nappies or other toiletries
- ✗ Cat and small animal litter, dog waste
- ✗ Vacuum cleaner bags, street sweepings
- ✗ Paper (unless it's been used to wrap organic waste)
- ✗ Treated wood or other bulky waste such as cleaning cloths, towels.
- ✗ Textiles
- ✗ Ash and other residual waste

We happy to answer any questions about organic waste:
